February 18, 2025

Manhattan Borough President Mark Levine
1 Centre Street, 19th Floor
New York, NY 10007

Dear Borough President Levine,

Manhattan Community Board 10 is writing in recommendation of the development of a Community Benefits Agreement (CBA) on behalf of the Brigadier General Charles Young Playground and the MEDILINK Concierge Healthcare For All facility located at 685 Malcolm X Boulevard, which is directly across the street from the park. The facility has expressed willingness to provide pro-bono emergency medical services to youth who may experience a medical emergency or sports injury as a result of participating in a sports activity while playing in the Brigadier General Charles Young Playground.

MEDILINK Concierge Healthcare For All utilizes MedPod technology to provide in-clinic or on-site patient-centric clinical care. Administration of the state-of-the-art futuristic medical care is designed to enhance the patient experience, provide better access to care, monitor patient data in a scalable way, all by leveraging the power of teleradiology. A true 360 telemedicine approach increasing access to care, anywhere. Medpod offers hardware software and clinical services that help providers extend healthcare access points further into communities and especially into the patients home. We aim to help practices save time and money while improving experiences for both patients and providers, alike.

Such a CBA would be of great benefit to the CB 10 Community as we anticipate extremely high and robust utilization of the newly renovated Brigadier General Charles Young ball-field; Cal Ripken, Sr. Foundation "Field of Dreams", scheduled for completion in September 2025. The multi-sport artificially turfed field will accommodate baseball, football, soccer, rugby, and lacrosse. We are asking for the support of your offices in this effort and look forward to your reply.

Best Regards,

Hon. Marquis Harrison
Chairperson
Manhattan Community Board 10
