Plans to manage vehicular traffic and crowds on the sidewalk

I plan to operate an establishment that will not negatively impact our neighbors. I am an experienced operator who has worked very hard to earn my reputation as a committed community partner and am confident this will be an establishment that CB2 will be proud to call its own.

I do not anticipate large crowds on the street. I will ensure that the premises are maintained in an orderly fashion at all times. I will designate an employee to make sure that a crowd of patrons will not form in front of or adjacent to my establishment as I do not want to disturb the quality of life of my fellow neighbors.

I will have signs visibly posted inside and on the storefront reminding patrons to be courteous of the neighborhood and to keep noise to a minimum. However, should a crowd form in front of or adjacent to my establishment, I will immediately inform the crowd that they are not able to congregate in front of the establishment.

I understand that parking is limited in the area. I anticipate that the overwhelming majority of our patrons will be walking; I plan to serve a community that lives and works in the immediate vicinity.

Plans to manage noise inside and outside of the premises

The establishment will have excellent soundproofing, ensuring that the conversations of patrons and the low background music will not emanate to the residential apartments surrounding my establishment. A sound level control instrument will be placed inside of the establishment as a warning to the staff should the noise become too loud. My cell number as well as those of the managers I employ will also be given to the manager of our building should they feel the need to call immediately if any noise is disturbing their quality of life.
