Q / A

Q: J. Kiley: what are the next steps for No More 24 Act.

A: Had hearing. Must be moved to a vote. Must be calendared by the Speaker at an upcoming Stated meeting.

Q: C. Flynn: Was there discussion at the Outdoor Dining roundtable around enforcement.

A: Enforcement is always the underlying concern. Without enforcement, there is no point in rule making.

Q: R. Sanz notes that during the temporary COVID Outdoor Dining program there were many restaurants included. Since then, many restaurants have not been able to apply. How much revenue has the City lost due to the difficulty in applying and the seasonal nature of

roadway dining?

A: There have been a few hundred applications processed, instead of the thousands seen during the pandemic. Notes that the process is slow. Many have applied and have not yet been permitted.

NYC Council Member Harvey Epstein, District 2:

- Thanks the Board for their leadership, especially around the Merchant House application. The C-M supports the efforts to protect the Museum from construction next door and favors the solution of having the City purchase the lot next door.

ADOPTION OF MINUTES

The minutes of January 2026 Full Board were adopted by acclamation.

BUSINESS SESSION

Chair's Report: Valerie De La Rosa

Reapplication Cycle - Board members whose terms expire this year should have received an email today regarding reapplication.

Pride Flag at Stonewall – CB2 sent a letter to the US Department of the Interior (National Park Service) condemning the action of removing the Pride flag at Stonewall and calling for its restoration.

Committee Assignments

- New members appointed in 2025 will be assigned to committees shortly.
- Several committee assignments have already been made for both newly appointed members and longer-serving members. Formal introductions are forthcoming.

Human Services Committee and Schools and Education Committee

- A 60-day working group is starting next month in place of these Committees. An interim leader has been identified, but appointment is pending conflict resolution training.
- The original goal was to have a 30-day transition period led by Juliet, but this plan has changed in light of Juliet's resignation from the Board. V. De La Rosa will be in touch regarding the details and next steps.

Conflict Resolution Training

- Based on advice from the MBPO's General Counsel, CB2 has reached out to the New York Peace Institute to explore the possibility of conflict resolution training for the Executive Committee, hopefully to be extended to the Full Board, funds permitting.
 - A contract with the NY Peace Institute is being evaluated.
- Q / A
Q. A. Brenna asks if there is a specific reason the Counsel advised on this point.
A. V. De La Rosa explains that a board member resigned based on concerns to be addressed by the potential conflict resolution training.

Reapplication Cycle

- Reapplications are due on Friday, February 27. This year's application asks for a personal reference.
- The MBPO has indicated that it will not be appointing lobbyists or appointees of elected officials as Members of Manhattan Community Boards.

Board Member Resignations

- R. Chattree, J. Kaye, and JJ Herrera are the most recent to have resigned.
- This brings the number of vacancies on CB2 to 6 including the resignations announced earlier this year and last Fall.

Calendar Review for March

- Would be helpful to have a Landmarks standby date for a second meeting in case it is needed (as it was in February).
- Schedule for the combined Human Services and Education working group forthcoming.

District Manager's Report: Mark Diller

Thanks!

- Wishing a speedy recovery to our Audio Consultant, who called this afternoon with a serious illness (and a desire not to share what he came down with).
- Many thanks to Ryosuke Nava, our tech assistant for the evening, who responded at the 59th minute of the 11th hour to assist. Appreciate everyone's patience under these circumstances.
- Thanks to our NYU hosts, including Arlene, Valentine and Dorothy! We are very grateful to be able to hold our meeting here and have a familiar venue especially when setup is an issue like today.

Election of Officers

- The Board will conduct an Election for officers at the March meeting.
- Per the bylaws, Members may self-nominate up to one week before the February meeting, and nominations will be reopened during the February meeting.
- The following self-nominations were received last week:
 - For Chair, Valerie De La Rosa
 - For Treasurer, Antony Wong
 - For Secretary, Emma Smith
- There are currently no self nominations for First or Second Vice Chair or Assistant Secretary. Floor will be opened during this meeting. Please consider the Assistant Secretary position – it is a great way to become more deeply involved in the Board.
- There will be a hybrid ballot again this year – both a paper ballot for those in the room and an electronic ballot.
- The ballots cannot be sent out in advance, as only those who respond to the Full Board Business Session roll call are eligible to vote.
- The Bylaws call for a Tally committee to oversee the vote counting. The Tally Committee per the bylaws consists of the BP's representative (Andrew Chang), a representative from another elected official's office (Conor Allerton of C-M Marte's Office), and a CB2 Committee Chair (volunteer needed).
- Voting will take place at the March Full Board meeting.
 - The voting will be greatly expedited and simplified if as many people as possible vote using the electronic ballot, even if you are in person in the room. The electronic ballot automatically populates a vote tabulation spreadsheet.

Independent Budget Office (IBO) Sessions on the Preliminary Budget

- IBO is holding working sessions on the Mayor's Preliminary Budget, to take place on March 4 and 5. Mark will forward the invitation for this session.

Village Interagency Task Force

- No meeting has been held so far in 2026, in part because the facilitator previously in the old Community Affairs Unit at City Hall has been let go.
- The leaders and members of the Task Force are seeking to continue its work.

Homeless Outreach Population Estimate (HOPE) Count

- Cancelled due to extreme weather in January and February. Will take place on the night of Tuesday, March 3 [later further postponed to March 10].

STANDING COMMITTEE REPORTS WITH RESOLUTIONS

LANDMARKS 1

375 Lafayette Street / 20 Great Jones Street (NoHo Historic District Extension) – Application is to construct a new as-of-right 19-story residential building on the existing parking lot site.

Whereas:

A. The building site is on a transitional corner lot between the large building originally occupied by an elaborate mission building on Lafayette Street and the buildings to the east on Great Jones Street; and

B. The Applicant showed a number of historic buildings in the district which were said to have provided inspiration, none of which, apart from the full-block Wanamaker Building, approached the size and height of this building, and all of the examples had historic design and materials in harmony with the district – not evident here; and

C. The lack of harmony with neighboring buildings and most of the buildings in the district is all the more evident owing to the facades' flat surface treatment, lack of articulation, monochromatic palette, and the height, which is exaggerated by strong vertical column-like detailing in terracotta cladding; and

D. The facade on Great Jones Street has no meaningful transition from the bulk and height on Lafayette Street to the adjacent, small historic buildings on this street; and

E. The building occupies the entire lot, is 195 feet tall with approximately 288,000 square feet, is divided into 200-210 apartments, 50-53 of which are affordable at 60% AMI; and

F. The “building” is presented as two separate structures with two entrances, without a discernible architectural rationale. This configuration gives the appearance of a single, irregularly massed building in a historic district where strict rectilinear forms are the norm; and

G. The building's size is amplified by, among other details – lack of articulation, lack of sufficient cornices at the intermediate and top floors, flatness of the facade especially with the

minimally recessed elongated side-hinged windows and appear like a curtain wall rather than the typical punched window design of the district openings with no articulated depth and shadow, repetitive planes, use of one cladding material (terracotta) in the same color thorough with minimal detailing in other materials, and the column-like articulation running uninterrupted for the entire height of the building which accentuates the height; and;

H. The north facade is at the property lot line and in the “back” and is visually a primary facade looming over the two small adjacent buildings (only 4 and 5 stories high) and requires treatment accordingly, especially the elimination of the blank wall sections toward Lafayette Street and a recessed section to the east; and

I. The Lafayette Street facade embodies the objectionable elements throughout, presenting an unwelcome contrast with the historic buildings across the street and along the block; and

J. The east facade is completely visible from the historically intact portion of Great Jones Street and was not shown in the presentation materials, nor was it reviewed in the presentation, and it is presumed to be the same unacceptable general design as the northern facade; and

K. The south facade is a long, uninterrupted repeat of the Lafayette Street facade with an awkward, uncharacteristic three-section step-down creating narrow terraces toward the east, which seem carved out after the construction of the facade and do not provide any transition to the small buildings in Great Jones Street; and

L. The ground floor is repeated identical retail bays with simple metal-framed windows and without the important element of bulkheads and modest signage is proposed along Lafayette Street and turning the corner onto Great Jones Street: two residential entrances, one with a marque and a large garage entrance with a plane brown door that appears as a panel inserted to mask the interior rather than as an entrance is at the east end adjacent to the first building on Great Jones Street; and

M. The eastern portion of the south facade provides no essential transition from the bulky building into the modest historic buildings along Great Jones Street and instead hides the buildings, interrupting the sense of the whole of the historic street; and

N. The mechanical rooftop equipment is masked with metal screening and appears to conform to regulations; and

O. Throughout the presentation the Applicant represented over and over that the purpose of the design was to provide the maximum number of apartments and that the size be sufficient to provide the maximum number of affordable apartments and did not point out that under the

zoning regulations in place that the size of the building could be reduced up to approximately 10% and the number of affordable apartments would not be lessened; and

P. There was testimony from Village Preservation objecting to the size and design and its general unsuitability in the historic district; and

Q. Sixteen residents of Great Jones Street and elsewhere in the district spoke in opposition to the application, primarily concerned about its size and its impact on the historic character of the district and the appearance of the streetscape; and

R. Several speakers, none with a connection to the district, representing trade organizations and advocacy groups, and one member of the public from outside the district spoke in favor of the application, only citing their groups' financial interests; and

S. The building, with its bulk, height, lack of articulation, and no harmony with the historic buildings in the district, and ignoring any relationship to the neighboring buildings in Great Jones Street, and making no attempt to moderate its size without the loss of affordable housing, is not suitable to the historic district now; and

T. Under the 2025 [City of Yes Housing Opportunity](#) (COYHO) zoning text amendment, the FAR for 375 Lafayette / 20 Great Jones Street increased from 9.7 to 10.8, increasing as-of-right square footage by approximately 77,0000 sq. ft. from 213,000 sq. ft. to 290,000 sq. ft.; and

- The stated goal of COYHO was to [“build a little more housing in every neighborhood.”](#) More density was intended to produce more homes. However, the current proposal shows only 200–210 total units, 50–53 affordable units, even at the higher 10.8 FAR; and
- Under the earlier SoHo/NoHo rezoning at 9.7 FAR, the city projected that this site would yield 212 residential units, including 53 affordable units at 25% AMI; Despite significantly more allowable floor area allowed through COYHO, the project is producing roughly the same — or even fewer — homes than previously projected at the lower density from the recent rezoning; and
- This suggests the additional FAR is not being used to increase housing supply. Instead, it appears to be going toward larger units, parking, retail space, or other uses; and

U. By choice, the developer is depriving construction workers of higher wages by designing 375 Lafayette / 20 Great Jones Street as two separate 100+ unit buildings. [Under 485-x](#), this allows the developer to pay minimum wages of \$40/hr. versus if they designed one building with over 150 units, in which case construction workers would receive a substantially higher wage — the lesser of \$72.45/hour or 65% of the greatest prevailing rate of wages and supplements within a classification.

Therefore be it resolved that CB2 Manhattan recommends:

A. Denial of the application unless meaningful changes are made to reduce the actual bulk, keeping the minimum size necessary to preserve the proposed square footage for affordable housing apartments; and

B. Unless materials and detailing referencing historic design principles to reduce the perceived height and flatness and present a more harmonious appearance with the historic buildings adjacent, across the street, and in the neighborhood, and

C. Unless the large, highly visible north and east lot line facades are treated as primary facades, in particular, by eliminating the blank walls; and

D. Unless special care is taken to make considerable changes to provide a meaningful transition from the front portion of the building on Great Jones Street into the low-scale buildings along the street to the east; and

E. That the Commission and other City Agencies consider that the City of Yes Housing Opportunity was intended to “build a little more housing in every neighborhood” by providing increased FAR for that purpose. However, in this case, the Applicant proposed a vastly oversized building utilizing at or near the maximum FAR, undermining the purpose of the additional FAR provided by the COYHO and overwhelming the NoHo Historic District Extension in the process. The Commission and the City should recognize that the number of housing units at 375 Lafayette / 20 Great Jones Street should meaningfully increase, and the project should be revised to reflect that intent.

Vote: Passed, 24 Board Members in favor, 10 against (W. Benesh, C. Dignes, DJ Jain, R. Kessler, J. Liff, P. McDaid, E. Olson, R. Sanz, E. Siegel, E. Smith), 1 recusal (R. Caccappolo).

LANDMARKS 2

1. ***52 Gansevoort Street (Gansevoort Market Historic District)** – Application is to install a painted wall sign

Whereas:

A. The proposal is for a modest painted sign depicting the name of the business on the facade of the building, and the Applicant represented that the sign conforms to regulations for the building and the district; and

- B. A photograph was shown illustrating that the building had a similar painted sign earlier; and
- C. The Applicant stated that the paint and method of application will permit the removal of the sign without harming the fabric of the building; now

Therefore be it resolved that CB2 Manhattan recommends approval of the painted wall sign.

Vote: Unanimous, 35 Board Members in favor.

2. *27 E. 4th Street (NoHo Historic District Extension) – Application is to demolish an existing building and to construct a new building.

Whereas:

- A. The proposed building is immediately adjacent to Merchant’s House Museum (Tredwell House), a significant and fragile individual exterior and interior landmark with the original structure, fittings and ornamentation intact that is designated as a landmark on City, State, and Federal levels, and is of great importance for its historical connection to the Underground Railroad including certain architectural elements in the house used in this connection; and
- B. The existing garage that is proposed to be demolished is non-historic and undistinguished, and its demolition, provided that it is done with the greatest of care not to disturb the Merchant’s House, would not harm the historic character of the neighborhood; and
- C. The original house on the site, similar in size to the Merchant’s House with which it shared a party wall, was replaced by the garage, and no large building has ever occupied the site; and
- D. The proposed nine- story office building, with a ground-floor gallery or restaurant space, is larger than two previous proposals (unbuilt), and the front facade has three bays with entrances and arched tops of varying heights and recessed long-arched windows behind and the east lot line wall with a large number of windows was represented by the applicant as conforming to applicable regulations and the rear facade has conventional size arched windows; and
- E. The height, 103’ to the roof and 121’ 6” height to the top of the elevator bulkhead and depth of 27’ 2 1/2” at the ground floor and 95’ 1/2” for the upper floors is larger than the previously proposed buildings for the site, overwhelms the Merchant’s House, makes the House’s garden wall seem like a base for the wall of the new building rather than a dividing wall with space beyond it, and casts shadow across the garden for much of the day; and

F. The alley to the north of the property is to be resurfaced in Belgian block for use as a patio by the ground-floor tenant; and

G. The engineering studies and plans were represented as having consideration of the party wall, the foundations, the structure of the house and the ornamental plaster, though no evidence was provided that there have been *in situ* studies of the structure, its fittings, or specific consideration of the organic interconnection of its exterior masonry walls, lathing, decorative plaster and woodwork, where damage to one part creates particular vulnerability within the whole, especially the fragile plasterwork; and

H. No information was provided as to the method and equipment to be used for the excavation, which is to be incremental and performed in an enclosure, and benching is to be used to minimize the disturbance to the House; and

I. The prophylactic monitoring system that will be used was represented as being adequate to protect the structure, the fittings, and the plaster work, though onsite studies have not been done, and the Applicant was unable to state the degree of movement that would be short of causing damage; and

J. The monitoring plans are based on generalized guidance and there was no indication that a study has been carried out of the specific condition of the Merchant's House including below grade, structure, fittings, and plaster and other detailing that would inform the plans for excavation and construction and there was no indication of a plan to secure the house during construction, such as reinforcement of the structure and encasing the plaster; and

K. The Director of the Merchant's House, Pi Gardiner, gave testimony concerning the history of the House, the activities carried out for the public, the physical and financial difficulties of vacating and securing the house during any construction and the necessity of closure, and recent authentication that a concealed roughly crafted "chute" running from the second floor to the cellar at the west side of the house was added to the house after construction by the original owner and was associated with the Underground Railroad; and

L. A former member of the Commission with particular expertise in plaster challenged the applicant's certainty that demolition, excavation, and construction proposed could be carried out with the surety that the structure, especially the historically important "chute", the fittings, and the plaster would survive; and

M. There was testimony from an engineering consultant for the House (delivered by the House attorney) that the degree of tolerance with respect to the stability of the original plaster could not be confidently determined and measured and he presented a study that challenged the assumption

that the tolerable standards for vibration, compression and settlement provided by the applicant would ensure that no damage would occur; and

N. The chimney at the west wall of the House would need to be extended above the top of the new building, and this matter was not adequately addressed in the presentation and responses to questions about this were general, and it did not appear that the matter had been given due attention with respect to engineering and legal arrangements; and

O. The attorney testified about the damage that had previously occurred when the row house to the east was demolished, as well as future concerns about potential effects, during blizzards, of the certain snow drifting that would occur with a sheer wall on the west side of the roof supported by original framing, which is incapable of supporting the weight of the snow; and

P. Village Preservation presented testimony expressing strong concerns about the proposal, reiterating the importance of the Merchant's House Museum as a historic and cultural site for the people of the City of New York, and sharing that even if one were to accept that the precautions and procedures proposed by the applicant might be sufficient to protect the museum, there is no guarantee that such measures will be adhered to, emphasizing how often we have seen devastating impacts to neighboring historic properties - many even less vulnerable than the Merchant's House - when such extreme work is undertaken; and

Q. There was extensive oral testimony from the public opposing the application, with many of the points above cited, with some speakers representing groups or organizations, and there were more than 100 attendees who were unable to speak owing to time restraints; and

R. The Committee carefully considered all the testimony provided and was not confident that the structure and interior of the house would withstand demolition and construction along the lines proposed in the application for this – or any building – on the site adjacent to the House. The Committee was further not persuaded that the safeguards presented, including monitoring, however careful – no matter to what small degree of tolerance the monitoring was calibrated – could assure that the House, the fittings, and the plaster would not be seriously – and likely catastrophically harmed, noting that construction incidents involving heavy equipment and human error are unpredictable and can result in immediate and devastating consequences that monitoring will only confirm after the fact – when it is too late.

Therefore be it resolved that CB2, Manhattan recommends:

A. Denial of the application that, with its excavation, construction, appearance, and bulk, would cause irreparable aesthetic and structural harm to the Merchant's House Museum, an individual exterior and interior landmark with an important historic connection to the Underground Railroad; and

B. That the Commission recommend to the appropriate municipal agency that the lot be purchased by the City and used for a purpose that preserves and enhances the City-owned Merchant's House to provide administrative space that will enable the entire house to be open to the public and to further its mission to serve the public through its education programs and exhibitions.

Vote: Unanimous, 35 Board Members in favor.

LANDMARKS 3

1. *3 East 10th Street (Greenwich Village Historic District) – Application is to replace windows and install a rooftop pergola.

Whereas:

A. The existing row house penthouse was added when the house was remodeled in 1938; and

B. The heavy black metal pergola 15' X 16.5', essentially covering the entire width of the house, with operable louvers that completely close, presents an objectionable solid roof, and it is completely visible through an alley behind the house; and

C. The mechanical equipment is proposed to be masked by planting, where a fence would assure that the equipment is permanently masked were the plantings to be neglected or removed; and

D. In that the pergola does not meet the standard of "minimally visible" for rooftop additions to row houses in the district, it must meet a high standard to be appropriate to the house and the district; and

E. The structure would be made to appear less obtrusive with more delicate metal work in a lighter color and fixed louvers in a partially opened position that provide some protection and at the same time, give a view of the sky, and

F. A member of the public spoke in opposition to the application; now

Therefore be it resolved that CB2 Manhattan recommends:

- A. Denial of the pergola unless the structure is more delicate, is painted a color that minimizes its appearance, and that the louvers are fixed in a partially open position that does not obscure the sky; and
- B. That the plantings masking the mechanical equipment be backed with a fence that will serve to mask the equipment in the absence of the plantings.

Vote: Unanimous, 35 Board Members in favor.

2. *20 King Street (Charlton King Vandam Historic District) – Application is to restore the King St. facade, construct a 2-story rear yard addition and terrace above the new addition, construct a roof stair bulkhead, install rooftop railings, adjust rear mansard roof on 3rd floor, and replace all windows and install a stoop gate.

Whereas:

- A. The 1841 building has seen a series of alterations to the present state, including a rear yard extension; and
- B. The restoration will include replacing a degraded lintel with a faithful copy, and
- C. The self-closing stoop gate matching existing iron work faces a large tree pit that extends 16” in front of the east side of the stairs, and the proposed wide gate would unacceptably block pedestrian passage; and
- D. The window replacements are proposed to be in metal to mitigate sound in a district where historic wooden windows, which are available with triple glazing in historic design, are essential to preserve the historic character of the house; and
- E. The rear extension is to be rebuilt and extends to 20’ at the basement and 16’ at the parlor level, both with large multi-pane windows and a 19’ garden from the basement extension to the rear property line; and
- F. The rooftop bulkhead is set back to the maximum distance with a slanted roof to achieve minimal visibility from 6th Avenue, and the required safety railing is minimal; and
- G. A member of the public spoke with objection to the gate; now

Therefore be it resolved that CB2 Manhattan recommends:

- A. Denial of the non-historic metal windows and that instead they be in historic wooden design; and
- B. Denial of the stoop gate unless it is divided with only the west side normally operable to clear the existing tree pit and provide pedestrian passage; and
- C. Approval of the rear extension and the rooftop bulkhead.

Vote: Unanimous, 35 Board Members in favor.

3. *354 Bowery / 56 Great Jones Street (NoHo Historic District Extension) – Application is to construct a cantilever over 354 Bowery as part of a new residential building not included in the NoHo Historic District Extension at 56 Great Jones St.

Whereas:

- A. The application is for a cantilevered extension of a large modern style apartment building that in no way relates to the historic character of the designated district and that borders the district on two sides in a “carve out” section of the district and there is a similar a large corner area at the north end of the block and south end of the block with two five story tenement buildings between them that are within the district; and
- B. The proposed building without the cantilever has 103,350 sq. ft. of zoning floor area (ZFA), and 26,136 sq. ft. of that floor area would be devoted to affordable units. The proposed building with the cantilever has 108,590 sq. ft. ZFA, and 27,724 sq. ft. of that floor area would be affordable. The building is subject to MIH Option 1, which requires that 25% of the residential floor area be affordable to households earning an average of 60% of AMI, and at least 10% of the affordable housing must be affordable to households earning 40% of AMI.; and
- C. The building without the addition will have 70 market-rate apartments and approximately 24 affordable apartments (depending upon size distribution), and the addition of the 5,000 square feet in the extension might provide two or three additional affordable apartments totaling 1250 square feet, although the applicant was unable to definitively confirm this; and
- D. The transfer of air rights for the extension is to be obtained from the entire adjacent tax lot encompassing several buildings, and it would not preclude a rooftop addition to the tenement building or the adjacent tenement building of a size and height that would normally be approved for a five-story building in a designated district; and

E. The CB2 Community Board, in its support of the designation of the district in 2008, expressed grave concern that the parcels not included in the district would see outsized development that is not harmonious with the district, and this is exactly the situation that is evident with this application; and

F. In consideration of the situation that the design of the building, bordered on two sides by a designated district, has admittedly made no effort whatsoever to complement the historic character of the district that it borders, there is no justification for its extending above a historic building that is within the district; and

G. The applicant showed examples of cantilever construction built over historic buildings, and in these cases, the buildings were individual landmarks in a district that was not landmarked, and the properties benefited from the payments that enabled the historic buildings to be properly maintained and preserved; and

H. Village Preservation presented testimony in strong opposition to the proposal, asserting that there is no reason to allow this already gargantuan tower to intrude into the historic district and that **approval of the cantilever would set a disturbing precedent**, and further pointing out that without the inappropriate cantilever, this project already contains **significantly more housing than the original projections for the SoHo/NoHo rezoning made for this site**; and

I. Many members of the public, most of whom were residents of Great Jones Street, the area most affected by the proposal, spoke in opposition to the cantilever and two spoke in favor of the application, principally with points unrelated to landmark matters; now

Therefore be it resolved that CB2 Manhattan recommends denial of this application as an unwelcome intrusion into a landmark district from a building in a “carve out” portion of the district that has admittedly made no effort to be harmonious with the district.

Vote: Passed, 28 Board Members in favor, 5 against (C. Dignes, DJ Jain, R. Kessler, R. Sanz, E. Siegel), 2 abstentions (J. Liff, E. Smith).

4. *69 Gansevoort Street (Gansevoort Market Historic District) – Application to enlarge the existing partial-depth second floor forward with a 6-foot setback from the front façade, add a partially visible full-width rear bulkhead and a partial green roof, restore the front façade, and alter window and door openings and elements.

Whereas:

A. The building, fondly remembered as Florent - a much-loved restaurant that was an important fixture in the development of the district to its present state, had the upper floors removed in 1949 as a clear example of buildings cited in the Designation Report, with the frequent removal of upper floors in the change to become a market district; and

B. The standard for rooftop additions in the district (especially low rise buildings) is not followed with this aggressively visible 37' high structure, visually the same height as the ground floor of the building, and gives appearance of an added story rather than a rooftop addition and it is not plausible that such a massive structure could be required for the office use for the ground floor shop as represented by the applicant; and

C. The design is without any historic reference to the building or the district, nor does it show any consideration of the changes to buildings with the evolution in the neighborhood; and

D. The rear facade has a 20' x 24' multi-pane window again without any historic reference; and

E. There was testimony from Village Preservation in opposition, finding that the proposed rooftop addition is too tall and overly visible, and noting that the existing height of the building is significant, reflective of changing uses in Gansevoort Market, which is a character-defining feature of the district; and

F. There was considerable public testimony, all opposing the application; and

G. The proposed addition to this historic building is so totally inappropriate that no degree of modification would make it acceptable, now

Therefore be it resolved that CB2 Manhattan recommends:

Denial of the application as totally unsuitable for the building and the historic district.

Vote: Unanimous, 35 Board Members in favor.

5. *125 Grand Street (SoHo Cast Iron District) – Application is to construct a rooftop addition.

Whereas:

A. The penthouse is of a conventional design with wooden windows frequently seen in the district and is 16' x 18' x 11' high in light stucco with a 24' setback; and

B. It is set between two taller buildings and set back sufficiently that it is not visible from any public thoroughfare; and

C. There are ventilation ducts from a neighboring building that intrude into the space to be occupied by the construction, and the drawings appear to show their relocation; and

D. The Owner of the neighboring property expressed concern about ventilation ducts from her building that would be impacted by the construction, and the drawings appear to account for this situation; now

Therefore be it resolved that CB2 Manhattan recommends approval of the addition of a modest penthouse, provided that the ventilation ducts from the neighboring building are not blocked or are relocated.

Vote: Unanimous, 35 Board Members in favor.

6. 34 1/2 East 12th Street Police Athletic League Building

A. Andrew Berman, Executive Director of Village Preservation, briefed the Committee about concerns relating to the building.

B. The building is an individual landmark, originally a school, and is currently under the control of the Police Department, and was once used as a recreation center; and

C. The building been closed for many years and is obscured by scaffolding, resulting in its being a blight to the community; and

D. Maintenance appears to have been neglected, causing concern that it has fallen into considerable disrepair and that the basic structure may have been compromised; and

E. There is uncertainty about the intended use when the building is restored, and this decision merits a review by the Community Board to make a recommendation on this matter; and

F. A representative of the Police Department sent a letter to the Committee stating that restoration was pending funding from the city agency responsible for the appropriation, with no indication about when the funding is expected, details about the restoration, or about the reason for the years-long delay in restoring the building; and

G. Village Preservation will continue to work with the Committee to monitor the situation.

H. The Committee will prepare a statement with recommendations concerning the restoration and use of the building for consideration by the Board to be sent to the applicable agencies.

Vote: Unanimous, 35 Board Members in favor.

new 30-day notice to CB2M dated 1/7/2026 and was placed on the February/2026 SLA Committee agenda; and

- vi. **Whereas**, when the Applicant, Lu Wang, and her Attorney appeared before CB2M for a new restaurant wine license there was a lack of clarity regarding the application; the building being a large building with multiple ground floor retail shops, the Applicant being unclear as to which store front was hers stating she was taking over the photo lab, when asked if she would be on-site managing the premises she said a few days a week but that she had a manager who would be there on a daily basis, the manager not being a principal and not appearing before CB2M, the application as presented to CB2M said they would not employ a manager and did not provide a manager's name, the menu provided to CB2M as part of the instant application had the name Salmon Noodle on it, there being an existing restaurant on the ground floor of the building by that name, the Applicant explaining that they are Salmon Noodle, which is located next door to the photo lab, they were not expanding into the photo lab space, the Attorney then saying that it is a new business but they are trained by Salmon Noodle, the website for Salmon Noodle showing bottles of alcohol, the Attorney then saying he believed they were serving under a temporary license, despite the Attorney previously putting in writing to CB2M that they would not file the application with the NYSLA before coming to CB2M to present the application and affording CB2M the opportunity to make a recommendation to the NYSLA, both the Applicant and the Attorney seemingly unaware that the liquor license had been filed and unable to answer who filed the liquor license application or when, the Applicant unable to reach the manager to see who filed the liquor license application, the Attorney stating they would need more time to find out what happened with the application, CB2M asking that they lay the application over and return when they have sorted it out and can provide clarity on the application; and
- vii. **Whereas**, according to LAMP the application was received on 6/28/2025 and is under review, there being serious concerns that the Applicant seems unaware of basic aspects of the premises proposed to be licensed and that no one else has been named or has appeared that is familiar with the day-to-day operations or the application for a liquor license; the Attorney not having reached out to CB2M asking to lay over the application or to return to CB2M since appearing this month; and

THEREFORE BE IT RESOLVED that CB2M recommends denial of the Restaurant Wine application for **General Meal JP LLC 177 Lafayette St, Ste 100S 10013**; and

THEREFORE BE IT FURTHER RESOLVED that should this application be considered by the NYSLA, CB2 respectfully requests that this item be calendared to appear before the Members of the Authority and requests that the NYSLA send this Applicant back to CB2M prior to the issuance of any proposed restaurant wine license in order for CB2M to gain clarity on the application itself and who is managing/in charge of the premises proposed to be licensed and for

CB2M to have forwarded a recommendation to the NYSLA, in order that this important step not be avoided and that the concerns of the Community be fully heard.

- vi. **Whereas**, there was both written and in person testimony in opposition to the instant application from nearby residents and the West Village Residents Association (WVRA), the opposition mostly based on the oversaturation of liquor licenses in the overall and immediate area, the WVRA citing that in 2000 for zip code 10014, one out of ten retail premises were licensed (10%) and today that number is one out of three (30%); adjacent residents and residents of the building of the instant application wrote letters in support of the application; and

vehicles), the hours being sought are reasonable with a 10 PM closing Sundays to Wednesdays and hours not later than midnight the other days, the Applicant initially proposing 86 seats on the sidewalk and agreeing to eliminate the 16 seats in front of the retail storefront part of the premises in an effort to show work with the community; and

7. SH Resto NYC Corp 418-420 W 13th St 10014 (OP–Restaurant)

- i. Whereas**, the Applicant and the Applicant’s attorney appeared before Community Board 2, Manhattan’s (CB2M) SLA Licensing Committee #2 to present an application to the NYS Liquor Authority (NYSLA) for an On-Premises Restaurant Liquor License to operate a full-service traditional Mexican restaurant in the ground floor of a three (3)-story commercial building (ca. 1902) on Wes 13th Street between Washing Street and 9th Avenue (Block #645 / Lot #29), the building falling within NYC LPC’s designated Gansevoort Market Historic District; and
- ii. Whereas**, the ground floor premises is approximately 5,353 sq. ft; there will be 42 tables and 130 seats, 24 seats at high top tables and one bar with 20 seats for a total seated occupancy of 174 persons and legal occupancy of 297 persons, there is one (1) entrance serving as both patron ingress and egress, one (1) emergency exit and six (6) patron bathrooms; the store front infill being fixed with no operable doors or windows that open out to the sidewalk; and; there is no outdoor seating included with this application; and
- iii. Whereas**, the Applicant’s proposed hours of operation will be 11 AM to 1 AM Sundays through Wednesdays and 11 AM to 2 AM Thursdays through Saturdays with the last reservation being at 11 PM nightly and no walk-ins after 11 PM; music will be recorded background music only from iPods/CDs/streaming services and from a DJ curating music but will at all times be at background levels set by a limiter and played through the restaurant sound system, there will be no subwoofers; there will be no TVs, no live music, no promoted events or scheduled performance, no cover fees and no security personnel/doormen; and
- iv. Whereas**, the premises to be licensed has been licensed with an On-Premises liquor license from approximately 2010 to 2024 under Fig & Olive Thirteen Street LLC dba Fig & Olive (Lic ID # 0340-22-10391) as an Italian restaurant serving lunch and dinner with a method of operation of background music and closing not later than midnight nightly; and

- v. **Whereas**, the Applicant met with local residents and block associations via zoom where concerns were raised about the use of DJs playing at background levels as this has been a significant problem in other “restaurants” in the immediate area in the past, with the levels of music far exceeding background levels and the ambience and noise levels becoming more club-like than restaurant, the specific location of the instant application of not having any residences adjacent or within a block or more and the method of operation with no exterior seating or operable doors and windows being significant mitigating factors of any impacts to residents, the Applicant stating that they would not have subwoofers, that the DJ would only use the existing sound system at the existing levels and was there to curate the playlist only, and that their lease includes a clause that the premises needs to be soundproofed so as not to disrupt the commercial tenants on the upper floors of the building, the premises being located in an area in the Gansevoort Market Historic District (aka Meatpacking District) that has no adjacent residents nor any residents across the street, the premises does not have operable doors or windows with all of the operations being on the interior only; other concerns were raised that the Principals (two brothers) currently live, and have other licensed premises, in Canada and therefore would be absentee operators, the Applicants saying they will be spending significant time in NYC and will have a full-time manager on staff that they will introduce to the community prior to opening; and

- vi. **Whereas**, there were also concerns about traffic congestion caused by for-hire vehicles and the associated horn honking into the later hours as this has been a large problem for residents in surrounding blocks in the past, the Meatpacking District having essentially one northbound route through the blocks between Gansevoort and 14th Street on 9th Avenue and when 9th Avenue backs up it continues to back up down the residential area of Greenwich Street (which runs into 9th Avenue) and impacts all those residents until all hours of the night, the Applicant’s premises being located at the western end of 13th Street with for-hire vehicles having to travel on 9th Avenue and turn west on 13th Street, along with the other for-hire vehicles making the same turn to drop off patrons of Catch and Chateau Margaux (a private members club) which are located to the east of the Applicant and are very popular and already causing a back-up on 9th Avenue on busy evenings, the Applicants acknowledging that this would not be good for their patrons to have to sit in backed up traffic to arrive for dinner, and agreeing to direct for-hire vehicles instead to Washington Street, where patrons will not be dropped off in front of the premises, and additionally planning to work with area parking lots with an incentive for parking; and

- vii. **Whereas**, the Applicant has executed and has had notarized a Stipulations Agreement with CB2M that they agreed to submit to the NYSLA and agreed would be attached and incorporated into the method of operation of the new On-Premises Restaurant Liquor License, with those stipulations as follows:

1. Will be advertised and operated as a full-service traditional Mexican restaurant with the kitchen open and full menu items available until closing every night.
2. The hours of operation will be 11 AM to 1 AM Sundays through Wednesdays and 11 AM to 2 AM Thursdays through Saturdays with the last reservation being at 11 PM nightly and no walk-ins after 11 PM. All patrons will be cleared and no patrons will remain after stated closing time.

4. Will not operate a backyard garden or any other outdoor area for commercial purposes including any sidewalk café and/or roadbed seating
5. Will play background music at conversational levels only, inclusive of any private parties or events. Levels will be set at background levels recommended by acoustical engineer and will be maintained at those levels at all times. There will be no subwoofers. There may be a DJ to curate the music who will plug into the restaurant sound system at the established background levels.
6. Will have no more than 12 private events per year.
7. Will not have televisions.
8. Will close all doors and windows at all times, allowing only for patron ingress and egress.
9. Will ensure that all for-hire vehicles are directed to Washington Street for drop-offs and pick-ups.
10. Local community will be given the opportunity to meet with the on-site manager prior to opening and will be provided a contact phone number for someone who is available to address any issues, should they arise, in real time.
11. Will not install or have French doors, operable windows or open facades.
12. Will not make changes to the existing façade except to change signage or awning and will comply with all NYC Landmark Preservation Commission regulations..
13. Will comply with NYC Department of Buildings Regulations and keep current at all times required Permits and Certificates.

Whereas, the pop-up is expected to be open for one day, on Friday, February 6th from 10 AM to 6 PM, with setup beginning at 9 AM and the street clear by 7 PM; and

Whereas, the applicant is planning to set up timed appointments to limit the queue that forms at any given time; and

Whereas, the applicant intends to run the line against the building towards the adjacent dog park, as it is difficult to run the line along the curb due to the curb lane; and

STANDING COMMITTEE REPORTS WITHOUT RESOLUTIONS

PARKS AND WATERFRONT

Terese Flores, Regional Manager for the NYC Parks Department, attended the meeting and provided updates, context, and guidance related to 3 important in-process parks operations topics and/or planning priorities within the district:

- 1. Irrigation and watering needs**
- 2. Dogs in Parks / Dog run standards**
- 3. Snow removal volunteer needs (including snow shoveling)**

The first topic was an operational priority raised, listed and discussed by our committee in the annual District Needs Assessment document taking into account current and ongoing staffing realities within the district.

1. Irrigation & Watering Needs

Background: Many smaller parks lack permanent irrigation systems. Funding for irrigation system provisioning - so that plants can be watered - remains unresolved in CB2 parks. It is anticipated that we will experience dry spring/summer conditions similar to prior years. Unfortunately, CB2 district has lost its dedicated gardener, with no immediate replacement expected.

Current Challenges: With limited Parks Department staffing there is increased vulnerability of trees and horticultural areas, which leads to greater need for (and opportunity to address the issue via) community monitoring and supplemental watering.

Key Needs / Opportunities Identified:

- Twice-weekly watering by volunteers is the goal for parks without automated irrigation or on-site watering sources and without volunteers or partnerships in place to bring water to the spaces.
- In addition, community “eyes on the ground” to monitor plant health would be helpful. Issues should be directly communicated to Terese (email/text/call preferred). In addition, use of 311 complaints are beneficial to help prioritize staff deployment.

Discussion Highlights

- **Point Person System:**
Committee members have recently volunteered to check in on specific parks. As part of the role, they may be able to try to:
 - Monitor plant conditions.
 - Identify volunteer watering support.
 - Track issues/needs/volunteers/schedules in shared spreadsheets.
- **Outreach Strategies to get volunteers:**
 - CB2 weekly e-blast announcements.
 - Website messaging (“See something? Say something.”).
 - Park signage requesting watering volunteers.
 - Engagement with regular park users and nearby residents.
 - Outreach to local landlords and business groups.
- **Washington Square Park (WSP):** Has an administrator and structured volunteer network, so has the potential to assist nearby smaller parks (e.g., Minetta Playground, Golden Swan, etc.). Will Morrison (WSP administrator) has previously supported surrounding parks.
- **Seravalli Park (west side / Meatpacking area)** is one such space that has previously been flagged as frequently losing plants in the summer (on the western edge) for lack of irrigation. One idea: a potential collaboration with Meatpacking BID or adjacent partners for watering support.
- **Data Tracking:** to this end, a proposal was made to expand our committee’s Park Responsibility Spreadsheet to include columns for Irrigation status, On-site water access, Volunteer availability, Risk level during dry periods

Summary: Given staffing shortages and irrigation gaps, the committee will emphasize proactive volunteer coordination, improved communication, and systematic monitoring.

2. Dogs in Parks / Dog Run Standards

There are ongoing requests at our meetings for discussions regarding a change of rules for allowable dog activity (off-leash times in WSP) and new potential dog run locations. There are concerns about balancing dog use with other park functions and maintenance capacity and safety risks.

Ms. Flores shared two current Parks Department Guidance documents

- The Standard Operating Procedure (SOP) governs dog run design and placement.
<https://www.nycgovparks.org/facilities/dogareas>
- The Rules of the City of New York document
<https://codelibrary.amlegal.com/codes/newyorkcity/latest/NYCrules/0-0-0-87750> - specifically , section 01-04 (i) which says “Except as specified in 56 RCNY § 1-05(s)(3) or

in paragraph two of this subdivision, no person owning, possessing or controlling any animal shall cause or allow such animal to be unleashed or unrestrained in any park unless permitted by the Commissioner or authorized by law. No person owning, possessing or controlling any animal shall cause or allow such animal to be out of control in any park under any circumstances. Animals that are out of control may be seized and impounded. Violation of this paragraph constitutes a misdemeanor.

Some attendees conveyed that PEP or police officers have recently been issuing tickets with associated fines to owners that have been allowing their dogs to be off-leash.

Ms. Flores noted that that considerations for dog run sites (and other dog-related rules) include minimum size and spatial requirements; safety and visibility; compatibility with surrounding park uses; impact on horticulture and passive recreation; and maintenance feasibility given staffing levels.

I pledged that we would set up a meeting in the future on this request to consider allowing off-leash dogs at limited times in Washington Square Park, giving us time to publicize it, with WSP administrator Will Morrison participating.

Ms. Flores noted that such proposals must align with Parks Department standards and any additional maintenance implications would require careful consideration given current staffing shortages.

3. More Volunteer Needs, Including Snow Shoveling

The recent storm(s) and continuing cold weather has resulted in immediate requests for snow shoveling volunteers in some places, e.g., near LaGuardia Corner Garden and other Green Thumbs paces. Ms. Flores and our committee will consider leveraging existing support groups, Business Improvement Districts offices, and local residents and regular park users who might want to volunteer. We are not looking to remove the responsibilities of landlords and store owners, but there are some locations that do not have clear “owners” of the responsibility of eliminating snow. This might have been a freak, once in a decade, storm but if there are other snow events it would be great if volunteers could help the Parks Department.

Again, this request is broader than this current crisis from the snowstorm. City budget shortfalls and City prioritization decisions and Dept of Parks and Recreation staffing constraints are such that finding and encouraging volunteers to support our parks and open spaces has become even more important.

TRAFFIC AND TRANSPORTATION

CB2 T&T discussed how to fix W. 3rd Street between LaGuardia Place and Mercer Streets and the addition of crosswalks Bleecker Streets between LaGuardia Place and Mercer Streets. We

also discussed NYC DOT Safety Improvements on Morton Street between 7th Avenue South and Bleecker St. where a [wrong-way driver killed a pedestrian](#) in November 2025.

Background on Superblock Street Re-Design

In 2017, CB2 received a petition with approximately 600 signatures (at least 95% of them local) requesting traffic calming designs on both W. 3rd and Bleecker Streets between LaGuardia Place and Mercer St., including narrowing the streetbed on W. 3rd Street and adding midblock crosswalks to protect pedestrians crossing these streets. In response, [CB2 passed a resolution in February 2017 \(page 53\)](#) requesting that the NYC Department of Transportation (DOT) conduct a study of both streets.

In July 2018, NYC DOT presented plans for traffic calming and bike lanes on W. 3rd St. and W. 4th St. from Bowery to 6th Avenue and [CB2 passed a resolution supporting these and additional changes \(page 49\)](#). In 2022, while these plans were in the process of being implemented, CB2, residents, New York University and elected officials representatives conducted a walk through and identified several design adjustments. In July 2022, [CB2 passed a resolution supporting these changes \(page 50\)](#) but to date, the city has made no changes.

In January, CB2 scheduled another West 3rd Street walkthrough with NYC DOT, NYU and the 6th Precinct, but due to the snowstorm, we met virtually.

Current Street Design Not Working for Pedestrians, Cyclists, Cars and Trucks

During the virtual walk-through and at CB2's T&T meeting, there was near unanimous consensus that the current layout of W. 3rd Street is not working for pedestrians, cyclists, e-bikes, cars and delivery trucks.

The biggest safety improvements have come from the addition of the signal and crosswalk at W. 3rd and Wooster Streets and the mid-block speed bump.

However, the new design has created significant blind spots for pedestrians, cyclists, cars and trucks near the entrances to 2 Washington Square Village (at Greene St.) and 1 Washington Square Village (at Wooster St.).

All agreed that W. 3rd Street does not need an extended sidewalk on the southern side of the street given the preponderance of high-quality green space on both superblocks. Furthermore, the space is primarily used for parking, creating a bike lane surrounded by parked cars and often blocked for deliveries and access to illegal parking on the extended sidewalk.

At our meeting, we identified many better uses for the extended sidewalk space that will both improve safety and not require significant expense to implement.

IDENTIFIED NEEDS

Overall

1. Create a revised design that does not require regular traffic enforcement.

Use of Extra Space

2. Move the bike lane to the southern curb, expand it to two lanes and add protection.
3. Add truck loading zones – currently delivery, garbage and moving trucks either block traffic or the bike lane. While there is space for loading and unloading inside Washington Square Village (WSV), the low clearance requires most box trucks to load and unload on the street.
4. Add micromobility hubs and loading zones – currently, e-bikes share the single bike lane with moving cyclists and when they make deliveries, they park in the bike lane and block bike traffic;
5. Add another Citibike Rack just north of the protected double-wide bike lane (possibly already planned).

Parking Changes

6. Eliminate floating parking spots at the entrances to 1 and 2 WSV, clearly marked with concrete blocks and red/zebra stripes to improve visibility; and
7. Revise parking to permit NYU access to its north side loading dock.

Other Safety Improvements

8. Add a second speed bump near 2 WSV, closer to Mercer Street.
9. Add textured rumble strips to the bike lanes on W. 3rd St. before the entrances to 1 and 2 WSV and on Blecker St. before the entrances to 3 and 4 WSV.
10. Add crosswalks on Blecker Street at 3 WSV (at Wooster St.) and 4 WSV (at Greene St.)

New Information

Late last week, CB2 learned that any redesign of the streets would need to wait until a repaving of W. 3rd and Blecker Sts. several years down the road. As a result, CB2 will re-address these redesign needs at our February 25, 2027, meeting.

CB2 also discussed potential additional safety improvements to prevent left turns from Morton Street to Seventh Avenue South. These will be part of CB2's Seventh Avenue South discussion on February 25, 2026.
