05	EDC	Other capital budget request for EDC	<p>The Manhattan Cruise Ship terminal is an overwhelming source of pollution. When ships are docked, their engines run to generate power and keep the lights on, emitting thousands of tons of diesel particulates into the air. A docked ship's emission for one day equal 34,000 idling tractor trailers.</p> <p>Installing a socket for cruise ships to "plug-in" to draw power from the existing power grid will dramatically reduce diesel particulate matter and improve the water quality in the Hudson River. Cruise ship fleets are already turning over and the EDC should serve that demand to upgrade the terminal and reduce the carbon footprint of the cruise ship industry.</p>	Further investigation is required. Contact the agency.	This request requires further study.
