FRESH JUICE & RAW SUPER DRINK SMOOTHIES

Juicing helps your body absorb and metabolize all the beneficial nutrients in fresh produce. When you juice, the juicer breaks up the cells of the produce separating it from the fibrous pulp. Liquids go into our bloodstream and body systems instantaneously because it doesn't need to expend energy to digest the fiber. Our bodies absorb and assimilate food source vitamins very easily. Fresh juice nourishes our body with life-giving, vitamin rich, and easy to digest nutrition.

STARTERS JUICE

Carrot, beets, celery and apple

KOMBUCHA TAP

What is Kombucha? Kombucha consists of tea, sugar, clean water and a SCOBY. "SCOBY" stands for symbiotic culture of bacteria and yeasts. The sugar feeds the yeast and bacteria which form the SCOBY layer - the very identifiable, thick, mushroomy layer that rests on the top of the kombucha. The SCOBY adds the flavor, acidity, and promotes the fermentation which creates the health benefits. It also contains a small amount of alcohol (only .5%-3% depending on fermentation), gluconic, acetic, lactic acids and some substances that discourage bacteria. Many people describe the taste of kombucha as sweet and acidic - almost like soda with a slight vinegar taste. BENEFIT: kombucha's popularity is in part due to the probiotic content of good-for-you bacteria that studies show can benefit digestion and boost immunity.
